DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 23-44 have been considered but are moot in view of the new ground(s) of rejection.

Response to amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

a. A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23-24, 32-34, 42 are rejected under 35 U.S.C. 102(e) as being anticipated by Kroboth et al. (20040037230).

Regarding to claim 23, 33, Kroboth teaches incrementally generating traffic quantumms representative of said traffic (**Fig. 2, traffic is measure at #710 and traffic quantumms are generate to represent the traffic at Fig. 3A**) at an evaluation module (**Fig. 2,**

#702) independent from a plurality of exchanges and nodes of the communications network **(there are no relationship between #702 and plurality of data source #748, 746 etc., except collected from them)**; and producing **(representation of the traffic is produced at Fig. 3A)**, at the evaluation module **(Fig. 2, #702)**, a distribution of said traffic quantum over said links **(Fig. 3A is a traffic distribution measured over plurality of links #748, 746, 744 etc.,)** in said plurality according to said set of routing rules **([0024]: the measurement is according to routing rules, eg. congestion event will occur base on the routing decision make by plurality of exchange #748, 746 etc.,)**, the distribution thus obtained being statistically representative of the dispersion of said incoming traffic over said plurality of links at said exchange **(Fig. 3A)**.

Regarding to claim 24, 34 Kroboth teaches the method of claim 23, comprising the steps of: measuring the volume of said incoming traffic directed toward said given destination **([0018]: traffic are measured as traffic direct toward #710)**; and generating said traffic quantum by subdividing said measured traffic volume by a given number of loop steps **(Fig. 4, the normalization process)**.

Regarding to claim 32, 42 Kroboth teaches the method of claim 23, wherein said steps of incrementally generating traffic quantum representative of said traffic and producing a distribution of said traffic quantum are performed in the absence of interference with operation of said communications network **(data collector #710 do not send packet to**

each devices that it is morning thus there is no interference to those device).

Allowable Subject Matter

1. Claims 25-31, 35-41, 43-44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
